Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Election/Restrictions

Applicant's election of Group I and Species I in the reply filed on 02/04/07 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claims 3, 6-13, and 19-25 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected group and species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 02/04/07.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 2, 4, 5, 14, 16 and 18 are rejected under 35 U.S.C. 102(e) as being anticipated by Ramadan et al US Patent 6,517,580 B1.

Ramadan et al discloses an intervertebral implant (1) comprising a first fixing element (2) having an anchoring face (2₁) and a cooperation second face (2₂), a second fixing element (3) having an anchoring face (3₁) and a cooperation second face (3₂), a first prosthetic element (5) having an active first face (6), a second prosthetic element (7) having an active second face (8) wherein the two active faces interact with each other.

Art Unit: 3738

Regarding claim 2, the examiner interpreted the two distinct parts as follow: the first part is the cooperation face and the second part is the active face. Wherein one part defines a spherical cap portion.

Regarding claims 4 and 5, see Figure 1.

Regarding claim 14, each prosthetic element defines a different radii because each element its separate from the other.

Regarding the last two sentences of claim 16, the device is capable of enabling the prosthesis to be correct a tendency to scoliosis. Expressions relating the apparatus to contents thereof during an intended operation are of no significance in determining patentability of the apparatus claim. *Ex parte Thibault*, 164 USPQ 666, 667 (Bd. App. 1969).

Regarding claim 18, see Fig. 4 disclosing one triangle (see top triangle close to element 20) not aligned to a second triangle (see second triangle to the right of element 2).

Allowable Subject Matter

Claims 15 and 17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
